

**REMARKS**

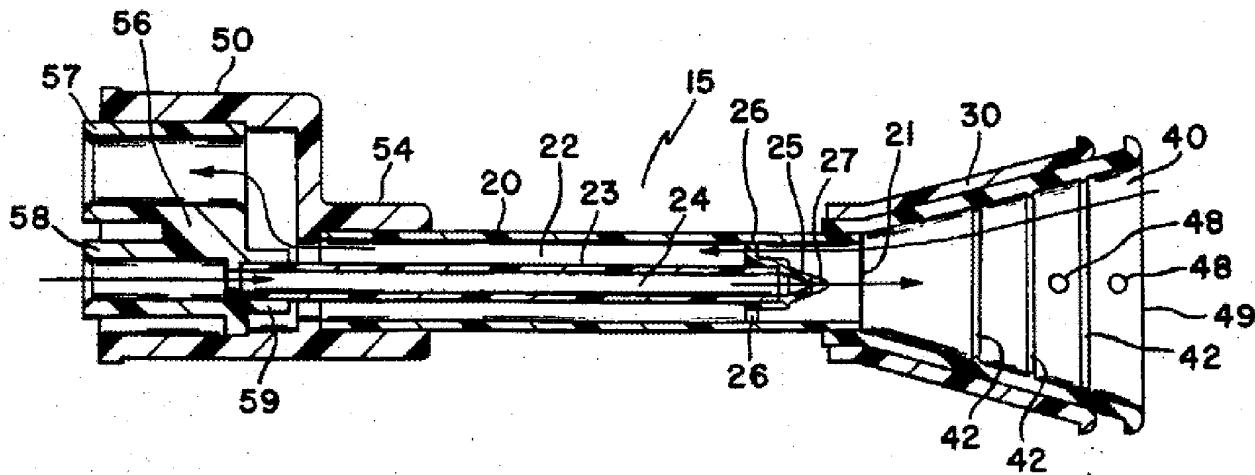

Claims 31, 32, 34-50 and 99-102 remain pending in the present application.

In response to the Office Action mailed October 9, 2007, Applicant respectfully requests the Examiner to reconsider the above-captioned application in view of the foregoing amendments and the following comments.

**Olson Does Not Make Claims 31-32, 34-47, and 99-102 Obvious**

Claims 32-32, 34-47, and 99-102 stand rejected under 35 U.S.C. § 103(a) as being obvious over U.S. Patent No. 4,692,140, issued to Olson. Applicant respectfully traverses the present rejection.

The Olson reference discloses a lavage/suction tip device with a splash shield, formed of two **nesting cones** 30, 40, as shown in the reproduction of Figure 3 below. However, nothing in the Olson reference teaches or suggests adding a **flexible sheet** to the device 15. Additionally,

Applicant submits that the broadest reasonable interpretation of the claim term "flexible sheet" cannot possibly include a set of cones that, by their stiffness, mate with each other, such as the cones 30, 40 of the Olson reference.

In contrast, Claim 31 recites, among other recitations, "a flexible sheet having an aperture configured to engage an irrigation device."

Similarly, Claim 49 recites, among other recitations, "a flexible sheet having an aperture configured to engage an irrigation device."

Finally, Claim 99 recites, among other recitations, "a flexible sheet having an elastically enlargeable aperture configured to fit over and releasably engage a head of an irrigation device."

**Appl. No.** : **10/776,309**  
**Filed** : **February 11, 2004**

As noted above, the Olson reference fails to teach a flexible sheet having an aperture configured to fit over a conical splash shield of an irrigation device.

Thus, Applicant submits that Claims 31, 49, and 99 clearly and nonobviously define over the Olson reference. Additionally, Applicant submits that Claims 32, 35-47, and 100-102 also define over the Olson reference, not only because they depend from one of Claims 31, 49, or 99, but also on their own merit.

**The Proposed Combination of Olson/Holloway et al. Does Not Make Claims 48-50 Obvious**

Claims 48-50 stand rejected under 35 U.S.C. § 103(a) as being obvious over Olson (discussed above) in view of U.S. Patent No. 5,381,562, issued to Holloway et al. Applicant respectfully traverses the present rejection.

However, as noted above, Applicant submits that Claims 31 and 49 clearly and non-obviously defines over the Olson reference, at least because Olson does not disclose a flexible sheet, as noted above. Holloway et al. does not rectify this failure. Thus, Applicant submits that Claim 49 clearly and non-obviously defines over the proposed combination of Olson and Holloway et al. Additionally, Applicant submits that Claims 48 and 50 also define over the cited reference, not only because they depend from one of Claims 31 or 49, but also on their own merit.

**SUMMARY**

The undersigned has made a good faith effort to respond to all of the rejections and objections in the case and to place the claims in condition for immediate allowance. Nevertheless, if any undeveloped issues remain or if any issues require clarification, the Examiner is respectfully requested to call Applicant's attorney in order to resolve such issue promptly.
